

NTK EUROPE
The Hydraulic Component Specialist

THE HYDRAULIC COMPONENT SPECIALIST

NTK EUROPE IS A LEADING MANUFACTURER OF HIGH PRECISION COMPONENTS FOR THE HYDRAULIC SECTOR.

OUR MISSION

Our business, which began in 1997 with the production of turned mechanical components, has become increasingly specialized in the hydraulic sector.

The finishing processes such as honing, grinding, hard turning, laser welding and infill welding has become our distinctive feature.

We also manage a network of expert suppliers in surface and thermal treatments.

We assemble, test, certify and guarantee the quality of every single component produced and sold. In 2018 we expanded the range of products offered to the coils produced completely by internal processes.

RELATIONSHIP BASED ON VALUES

Starting from the solid thoughts of our past, this Code of Ethics confirms to us all that our decisions, our actions are based on values. With this Code of Ethics we have entrusted our values with the task of reducing, even for the future, our uncertainties, of orienting our behavior, but also of offering answers to all people who have relationships, in various capacities, with our company.

Today more than ever it is essential to confirm our ethical vision, to clearly express our common principles, values and responsibilities.

These principles guide our behavior in relations with the customers and suppliers and with the people who work with us and with the interested parties with whom we deal.

*RELIABILITY, HONESTY AND CONFIDENTIALITY
DISTINGUISH US IN RELATIONSHIPS
WITH WHOEVER WANTS TO COLLABORATE
WITH OUR ORGANIZATION.*

All our products are made on design and in close collaboration with our customers. Technological innovation, customer service and product and process quality have always been the basis of our growth strategy.

QUALITY POLICY

*THE QUALITY SYSTEM
OF OUR COMPANY
IS CERTIFIED
ACCORDING TO THE
ISO9001 STANDARDS
SINCE 1999.*

The Management has chosen to comply with the UNI EN ISO 9001: 2015 standard and the continuous improvement deriving from its application as a management tool for achieving the goals. The General Management performs periodic reviews, promotes improvement actions for the following period and ascertains the continued suitability of this policy.

The company quality policy is focused on pursuing customer satisfaction, trust and loyalty and full compliance with applicable regulations and mandatory laws. To achieve this, the company organization undertakes to achieve and maintain the following objectives:

- satisfaction of the explicit and implicit needs and expectations of customers. The first deriving from the commitments assumed in the contractual phase, the second from the quality of the human relationship and the service rendered;
- updated and adequate regulatory and technological knowledge;
- fulfillment of safety, hygiene and environmental protection requirements established by the laws in force;
- involvement of company personnel who, feeling part of a team aimed at pursuing business success, must find the most appropriate atmosphere and stimuli for its development, security and fulfillment;
- achieving expectations of the property in relation to the achievement of the desired level of return with respect to the resources employed;
- achieving expectations of suppliers and business partners in order to achieve high levels of collaboration for the purpose of common growth;
- optimal management of resources (financial, infrastructural, human and environmental) in order to guarantee an effective and continuous support for the growth and success of the company.

The Management has chosen to comply with the UNI EN ISO 9001: 2015 standard and the continuous improvement deriving from its application as a management tool for achieving the goals. The General Management performs periodic reviews, promotes improvement actions for the following period and ascertains the continued suitability of this policy.
